

MEDIA ANNOUNCEMENT

7 November 2011

Gold Road Receives RESOURCESTOCKS Explorer of the Year and People's Choice Awards

Gold Road Resources Limited (**Gold Road** or the **Company**) (ASX: GOR) is pleased to announce that the Company has received both the RESOURCESTOCKS Explorer of the Year and People's Choice Awards for 2011.

In awarding the Explorer of the Year title, RESOURCESTOCKS cited the potential for the Yamarna project to open up a new gold district in far eastern Western Australia, with the Yamarna Belt being considered alongside the Tropicana gold joint venture as the next generation of gold provinces in Western Australia.

The People's Choice Award, chosen by readers of RESOURCESTOCKS and online readers of MiningNews.net and EnergyNewsBulletin.net, received numerous nominations citing the Company's "quality management", "large tenements" and "huge potential".

Gold Road Executive Chairman Ian Murray said that the Company was pleased to "make the grade" in receiving these awards.

"These awards again demonstrate the success of our exploration program at Yamarna," said Mr Murray.

"Receiving the same People's Choice Award as previously bestowed to inspirational peers such as Sandfire Resources and Extract Resources is particularly gratifying. I very much look forward to Gold Road seeking to emulate the success of previous winners.

"Ultimately of course, we one day aim to be eligible to receive a 'producer of the year' award, building on our successful exploration program. We've still got a lot of work ahead to achieve this, and the recent support shown by our shareholders for our capital raising will allow us to continue Gold Road's progress towards this goal," said Mr Murray.

RESOURCESTOCKS is a global resource investment magazine and remains a magazine of choice for investors and promoters who are active in the share market and provides current information on listed resource companies and resource related investment topics.

About Gold Road Resources Limited

Gold Road Resources Limited (ASX: GOR) is a gold exploration company which owns tenements covering over 5,000 square kilometres of the Yamarna greenstone belt. The Yamarna Belt is located approximately 150km east of Laverton on the eastern edge of the Yilgarn Craton.

In recognition of the success of the exploration programs at the Yamarna Belt, Gold Road is the winner of the Emerging Company 2011 award (Diggers & Dealers Conference), the Excellence in Exploration & Discovery 2011 award (Mines & Money Australia) and both the Resourcestocks Explorer of the Year and People's Choice awards.

The Yamarna Belt, adjacent to the 500km long Yamarna shear zone, is a historically under-explored region that is highly prospective for gold mineralisation and hosts a number of significant new discoveries. It lies north of the recently discovered 5 million ounce Tropicana deposit owned jointly by AngloGold-Ashanti / Independence.

Gold Road is progressing two key gold trends, together with two recently discovered trends, on the Yamarna Belt:

- **Attila Trend**, which includes Attila, Alaric, Khan and Khan North Projects and extends for over 33 kilometres and hosts a significant JORC resource.
- **Central Bore Area** is a 6km² area east of the southern extent of the Attila Trend which has delivered five new discoveries in 15 months. Key projects in the Area include:
 - **Central Bore Project** - gold mineralisation over a strike length of 800 metres and from surface to a depth of 300 metres; assay results of up to 1,000g/t gold, remains open to the north, south and depth; hosts a significant JORC resource.
 - **Justinian Project** – 200 metres east of the Central Bore Project, 600 metres long, wider structure than Central Bore, with intercepts up to 7 metres @ 27g/t Au.
 - **Central Bore North** - 500 metres north of the Central Bore Project's high-grade Imperial Shoot.
 - **Byzantium Project** – 500 metres west of the Central Bore Project, 1 kilometre long, VMS style base metal prospect.
 - **Hann Project** – 2.4 kilometres west of the Central Bore Project, 4.3 kilometre long, three parallel gold anomalies.
- **Tobin Hill** – 5.5 kilometres south-east of the Central Bore, 1.5 kilometre gold anomaly.
- **Dorothy Hills** – 23 kilometres north-east of the Central Bore, two gold anomalies, 1.4 and 1.8 kilometre long.

NOTES:

The information in this report which relates to Exploration Results or Mineral Resources is based on information compiled by Ziggy Lubieniecki, the Technical Director of Gold Road Resources Limited, who is a Member of the Australasian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists. Ziggy Lubieniecki has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration to qualify as a Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Ziggy Lubieniecki consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.
