Gold Road Awarded at Mining Excellence Awards

Gold Road Resources Limited (**Gold Road** or the **Company**) (ASX: GOR) has received the award for “**Excellence in Exploration and Discovery**” at the 2011 Mines and Money Australia awards dinner, held in Sydney this week.

Nominations for the award come from around the globe and the winners are voted for by the international mining industry.

Gold Road’s Chairman, Ian Murray was delighted to receive the award as it highlights the Company’s recent exploration successes and its aggressive 2011 drilling program over its wholly-owned Yamarna gold belt in Western Australia. Drilling is targeting multiple gold prospects on and around its Central Bore and Attila gold projects. Approximately 123,000 metres of drilling has so far been completed since January 2011.

“This award is a great reflection of the hard work and dedication of our growing exploration team at Yamarna, which is led by our technical director Ziggy Lubieniecki. The Company will continue its aggressive exploration and transformation from pure explorer into explorer/developer/producer.” said Mr Murray.

“We strongly believe that Yamarna is an under-explored gold region and our continued exploration success, geological mapping and extensive pipeline of exploration targets gives us further confidence in this view.”

“With grades of up to 1,000 g/t gold and the discovery of parallel high-grade gold trends over a small proportion of our 5,000km² tenement area, we are extremely excited about the future and further proving up Yamarna as a new gold region.”

The Mining Excellence Awards aims to reward outstanding Australian companies and individuals for their contribution to the global mining industry.

About Gold Road Resources Limited

Gold Road Resources Limited (ASX: GOR) is a gold exploration company which owns tenements covering over 5,000 square kilometres of the Yamarna greenstone belt. The Yamarna Belt is located approximately 150km east of Laverton on the eastern edge of the Yilgarn Craton.

The Yamarna Belt, adjacent to the 500km long Yamarna shear zone, is a historically under-explored region that is highly prospective for gold mineralisation and hosts a number of significant new discoveries. It lies north of the recently discovered 5 million ounce Tropicana deposit owned jointly by AngloGold-Ashanti / Independence.

Gold Road is progressing two key gold trends, together with two recently discovered trends, on the Yamarna Belt:

- **Attila Trend**, which includes Attila, Alaric, Khan and Khan North Projects and extends for over 33 kilometres and hosts a significant JORC resource.
- **Central Bore Area** is a 6km² area east of the southern extent of the Attila Trend which has delivered six new discoveries in 24 months. Key projects in the Area include:
 - **Central Bore Project** - gold mineralisation over a strike length of 800 metres and from surface to a depth of 300 metres; assay results of up to 1,000 g/t gold, remains open to the north, south and depth; hosts a significant JORC resource.
 - **Justinian Project** – 200 metres east of the Central Bore Project, 600 metres long, wider structure than Central Bore, with intercepts up to 7m @ 27g/t gold.
 - **Central Bore North** - 500 metres north of the Central Bore Project's high-grade Imperial Shoot.
 - **Central Bore South** – 500 metre long mineralised structure south of the cross cutting Lubieniecki dyke
 - **Byzantium Project** – 500 metres west of the Central Bore Project, 1km long, VMS style base metal prospect.
 - **Hann Project** – 2.4 kilometre west of the Central Bore Project, 4.3 kilometre long, three parallel gold anomalies.
- **Tobin Hill** – 5.5 kilometres southeast of the Central Bore, 1.5 kilometre gold anomaly.
- **Dorothy Hills** – 23 kilometres north-east of the Central Bore, two gold anomalies, 1.4 and 1.8 kilometre long.

NOTES:

The information in this report which relates to Exploration Results or Mineral Resources is based on information compiled by Ziggy Lubieniecki, the Technical Director of Gold Road Resources Limited, who is a Member of the Australasian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists. Ziggy Lubieniecki has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration to qualify as a Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Ziggy Lubieniecki consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.
