Dear Sir / Madam

Reverse Circulation Drilling Intercepts High Grades at Alaric 2 Deposit

Eleckra Mines Limited ("Eleckra") (ASX: EKM) is pleased to announce the results from the first batch of assays from infill drilling at Alaric 2 Deposit from its current 7,000 metre RC drilling program at its 100% - owned Yamarna Gold Project. The Yamarna Gold Project is located approximately 150km east of Laverton on the eastern edge of the Yilgarn Craton and within the Yamarna Greenstone Belt.

The infill RC drilling at the **Alaric 2 Deposit** intersected numerous minerals zones with exciting high grade gold values.

Alaric 2 was selected for a **close-spaced** drilling program as one of two high-grade targets in the Yamarna Gold Resource, which had been selected for drilling in this program.

Fifteen RC holes for 2,123m have been drilled over five drill fences to test continuity of high-grade shoots within the Yamarna Gold Resource over a strike length of 150 metres, and down to a maximum depth of 198 metres.

Significant results from the first 11 holes of the 15 holes drilled at Alaric 2 include:

- 10 metres at 8.87 g/t Au from 52 metres including 1 metre at 22.12 g/t Au
including 1 metre at 10.19 g/t Au
including 1 metre at 20.67 g/t Au
including 1 metre at 20.62 g/t Au
- 2 metres at 10.92 g/t Au from 102 metres including 1 metre at 18.82 g/t Au
- 1 metre at 12.65 g/t Au from 67 metres
- 1 metre at 13.26 g/t Au from 108 metres
- 2 metres at 4.79 g/t Au from 123 metres

Eleckra is highly encouraged by the high grade and extent of these results at Alaric 2. The second batch of assays is expected in November. **The full evaluation and updated resource estimate at Alaric 2 is expected to be completed late 2009 or early 2010.**

The Alaric 2 Deposit is located approximately 9 kilometres north northwest of the Attila gold deposit at the southern end of the 17 km long Yamarna Gold Resource, which have combined Measured, Indicated and Inferred Mineral Resources of 19.8Mt at 1.44 g/t Au for 917,000 ounces of contained gold using a 0.5 g/t cut-off.

NOTES:

The information in this report which relates to Exploration Results, or Mineral Resources is based on information compiled by Ziggy Lubieniecki, the General Manager of Eleckra Mines Limited, who is a Member of the Australasian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists. Ziggy Lubieniecki has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration to qualify as a Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Ziggy Lubieniecki consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.

APPENDIX:

The Mineral Resources according to JORC code for the Yamarna Gold project (Refer to Eleckra's ASX announcement dated 1 September 2008).

*Table 2: The Mineral Resource inventory for the Yamarna Gold project as at 21 August 2008.
Note: rounding errors may occur.*

At 0.5 g/t Au Cut off	2008 Resource		
Resource Category	Tonnes	Au Grade (g/t)	Contained Au (Troy Oz)
Measured Resource	6,449,000	1.55	322,000
Indicated Resource	6,251,000	1.36	273,000
Inferred Resource	7,117,000	1.41	322,000
Total	19,817,000	1.44	917,000

At 1.0 g/t Au Cut off	2008 Resource		
Resource Category	Tonnes	Au Grade (g/t)	Contained Au (Troy Oz)
Measured Resource	5,027,000	1.75	283,000
Indicated Resource	3,745,000	1.75	211,000
Inferred Resource	4,356,000	1.82	255,000
Total	13,128,000	1.78	749,000
