

Eight-Hole Drilling Program Completed at Central Bore

Gold Road Resources Limited (**Gold Road** or the **Company**) (ASX: GOR) is pleased to announce results of up to **171 g/t** gold from the second drill hole of 2013 (hole 13CBDD0002) at its **Central Bore Project** located on its wholly-owned ~5,000km² Yamarna Belt in Western Australia.

Diamond drilling highlights:

- **4 metres @ 29 g/t Au** from **267 metres** including **0.5 metres @ 171 g/t Au**

(Notes: 1.0 g/t Au cut-off, the true widths are approximately 50% of the down-hole widths.)

Hole 13CBDD0002, which was completed in late January 2013, is the last hole of the eight-hole deeper diamond drill program which was designed to:

- increase confidence in the deeper sections of the resource (>250 metres below surface);
- expand the mine life; and
- establish ore shoot geometry at depth.

The full set of assay results from the program is listed in Appendix 1.

Gold Road Executive Chairman Ian Murray commented on the success of this program.

"The last drill hole intersected not only high-grade gold, but also showed a thickening of the lode in this position which is very encouraging."

Significant drill results from this program include (see figure 1):

- **4 metres @ 29.03 g/t Au** from **267 metres** including **0.5 metre @ 171.15 g/t Au** (13CBDD0002)
- **1.76 metres @ 34.4 g/t Au** from **270 metres** including 0.2 metres @ 219.1 g/t Au and 0.2 metres @ 73.6 g/t Au (12CBDD0046)
- **0.4 metres @ 104 g/t Au** from **328.6 metres** including 0.2 metres @ **185.2 g/t Au** (13CBDD0001)
- **3.2 metres @ 26.9 g/t Au** from **483 metres** including 1.2 metres @ 50.6 g/t Au and 0.2 metres @ 110.2 g/t Au (12CBDD0040)
- **0.5 metres @ 24.3 g/t Au** from **501 metres** (12CBD0042)

About Gold Road Resources Limited

Gold Road Resources Limited (ASX: GOR) is exploring and developing its wholly-owned Yamarna Belt, a newly discovered gold region covering ~5,000 square kilometres on the Yilgarn Craton, 150km east of Laverton in Western Australia.

The Yamarna Belt, adjacent to the 500 kilometre long Yamarna shear zone, is historically under-explored and highly prospective for gold mineralisation. Geologically similar to the prolific Kalgoorlie Gold Belt, the Yamarna Belt has a resource of 1.2 million ounces of gold, hosts a number of significant new discoveries and lies north of the 6.4 million ounce Tropicana deposit.

Gold Road is prioritising exploration of five **Gold Camp Targets** on the Yamarna Belt. Identified in 2012 through interpretation of various geological and geophysical data sets, each target has a 15-20 kilometre strike length and contains numerous prospects. Initial exploration of these Targets has been very encouraging.

Gold Road plans to fund exploration through production from its more developed projects – Central Bore and Attila. Central Bore has a JORC resource of 153,000 ounces of gold at an average grade of 9.1 g/t Au. Attila has a JORC resource of 1,060,000 ounces of gold at an average grade of 1.3 g/t. It extends more than 33 kilometres and contains numerous deposits including Attila, Alaric, Khan and Khan North.

Current JORC compliant Gold Resource. Note: rounding errors may occur

Project Name (cut-off)	'000t	Grade g/t Au	Ounces Au
Central Bore Project (1.0g/t) (2012)	519	9.13	153,000
Measured	22	22.35	16,000
Indicated	444	8.90	128,000
Inferred	53	5.25	9,000
Attila Trend (0.5g/t) (2012) (encompasses Attila South; Attila North; Alaric; Khan and Khan North projects)	25,527	1.29	1,060,000
Measured	8,382	1.44	389,000
Indicated	9,360	1.24	373,000
Inferred	7,785	1.19	298,000
TOTAL	26,046	1.45	1,213,000

NOTES:

The information in this report which relates to Exploration Results or Mineral Resources is based on information compiled by Ziggy Lubieniecki, the Technical Director of Gold Road Resources Limited, who is a Member of the Australasian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists. Mr Lubieniecki has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration to qualify as a Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Lubieniecki consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.
