Dear Shareholders

**ELECKRA MINES LIMITED WELCOMES NEW WA
GOVERNMENT & ANNOUNCES MAIDEN URANIUM RESOURCE**

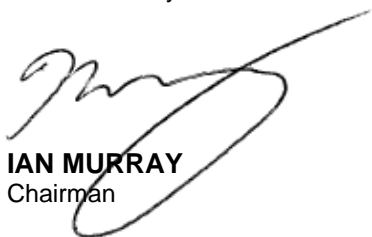

Eleckra Mines Limited (“Eleckra” or “the Company”) welcomes the Western Australian election results and the announcement on Sunday 14 September 2008 of the Liberal-National alliance leading to the new Liberal-National Western Australia government. This government is expected to be supportive of uranium mining in Western Australia, which will allow the Company to confidently move the Thatcher Soak uranium resource forward to the next stage.

The change of Government coincides with today’s announcement of Eleckra’s maiden uranium Inferred Mineral Resource estimate of 16.1 million tonnes at 174ppm U_3O_8 for 6.2 million pounds of contained U_3O_8 (approximately 2,800 tonnes of contained U_3O_8) at our Thatcher Soak project. This resource together with our neighbour, Uranex NL’s inferred resource of 14 million pounds U_3O_8 (refer Uranex NL ASX announcement 30 June 2008) means that the combined Thatcher Soak uranium deposit contains an inferred resource of just over 20 million pounds of uranium using a 100ppm cut off.

In Eleckra’s short two year history the Company has achieved a gold resource of 19.8mt at 1.44 g/t for 917,000 ounces contained gold, using a 0.5 g/t cut off (announced 1 September 2008) and now the uranium resource of 6.2 million pounds.

Our tenements at Yamarna cover approximately 5,000km² in area and in addition to the gold and uranium the project area is prospective for nickel, copper, chrome, platinum group elements and iron.

Yours sincerely

IAN MURRAY
Chairman
