

GOR.AU

Gold Road Resources Limited

A\$ 0.48

31 March 2011
 Gold, Uranium
 Australia (WA)
 Advanced Exploration
 Exchanges: ASX:GOR

GOR is the stand-out gold explorer in WA's Eastern Goldfields, with its share price up 352% in 12 months. We think out-performance is likely to continue in 2011, as the potential of GOR's dominant Yamarna Belt position is unlocked, and plans for potential production unfold.

Capital Profile

Share price (A\$)	0.48
52 week range (A\$/share)	0.08 to 0.55

Investment Points

GOR's focus is gold in the Eastern Goldfields, WA. Exploration budget increasing to ~A\$9mpa.

Strategic position (~5,000km²) in remote under-explored Yamarna greenstone belt in Yilgarn Craton.

Major milestone: Initial JORC resource statement for Central Bore discovery - 150kz at 7.86g/t grade.

Includes high grade Imperial Shoot, 57koz @ 23.1g/t.

Total Yamarna resource >1moz with 1.44g/t Atilla zone.

Drilling of additional high grade target zones in CY11: Justinian, Hann, Central Bore North and new targets.

Central Bore resource and new zone potential gives GOR confidence to be assessing fast track production.

With the initial Central Bore grades confirmed and major targets being drilled 1H11, our revised six month target range, with continued exploration success, is A\$0.48/share - A\$0.56/share.

Company Comment

Overview: GOR listed on the ASX July '06 as Eleckra Mines Ltd. Its focus is the Yamarna greenstone belt where it has now established >1moz gold resources, and a 6.2mlb shallow calcrete U₃O₈ resource. **Yamarna Project (WA):** (3,000km², gold) GOR's exploration focus is on the Yamarna greenstone belt - a regional scale mineralised trend considered prospective for multi-million ounce discoveries. GOR's (917koz (1.44g/t) resource occurs in the **Atilla zone** along a 33km strike length.

Central Bore ("CB"): (3.7km E of Atilla). CB was discovered in 2009 after drilling a RAB anomaly. A spectacularly successful RC drilling program in 2Q10 confirmed high grade mineralisation over an 800m strike length and 400m depth, open along strike and at depth. Recent RAB drilling indicates the mineralisation may extend up to 1.1km to the north (CB North) and 1.2km to the south. CB is a linear steeply dipping high grade carbonate narrow high grade vein system, parallel to the Atilla zone.

Central Bore JORC Resource: GOR has recently announced the maiden CB JORC resource, 595kt @ 7.9g/t for 150koz. Importantly the high grade Imperial Shoot contains 57.1koz @ 23.1g/t.

Parallel Discovery Zones: The four additional new zones discovered in the last 15 months in an area of only 6km² around CB have given GOR's exploration programs increased momentum. **Justinian** (200m E of CB), is an exciting high grade discovery (7m @ 27.2g/t incl. 1m @ 102g/t) indicating broader mineralised zones than CB. The **Hann anomaly** (2.4km W of CB) has now been extended to 4.3km length after recent soil geochem sampling. A major target for 2011, it is now being drilled (10,000m RC), 2Q10 drilling gave promising shallow intercepts. **Byzantium**, 500m E of CB, exhibits 2 anomalies ~1km long. The 4th zone, **Central Bore North**, suggests the start of the next high grade zone 500m N of CB.

Next Steps: GOR is dramatically increasing its planned drilling from 37,000m CY10 to a planned 95,000m in CY11. (Hann 30,000m, Central Bore 23,000m, Justinian 22,000m and new targets 20,000m). **Fast Track Development Potential:** Metallurgical testwork of CB ore has indicated high (>96%) metallurgical recoveries from CIL, and significant potential recovery in a gravity pre-leach circuit. GOR will be assessing the near term production potential. A low capex ~150ktpa operation to produce ~40kozpa could be the initial focus - size would increase if new zones increase resource size.

Golden Sands (WA): (1,500km², gold) GOR holds largely unexplored exploration tenements north of the AngloGold Ashanti/Independence Group **Tropicana** gold project (6moz resource).

Thatcher Soak (WA): (500km², uranium) GOR holds E portion of the Thatcher Soak calcrete uranium prospect, (total 20mlb resource - UNX 14mlb and GOR 6.2mlb). Likely to be sold with UNX's stake.

Corporate: 4Q10 placement at A\$0.34 raised A\$9m, A\$4.9m options exercise to come by mid 2011.

Investment Comment: With a 150koz Central Bore initial resource now defined, the key to maintaining share price out-performance for GOR will be reproducing that exploration success in the new target zones being drilled in 2011, thereby maintaining 'resource momentum'. If that is achieved, we see the share price in the next six months heading towards the upper level of our target range of **A\$0.48/share to A\$0.56/share** (fully diluted)

Key Projects

Project	Ownership/Option	Metal	JV Partner	Target Type	Process Route	Project Status	Location
Yamarna - Central Bore	100%	Au	none	ox/sulp	gravity/CIP	Adv. Expl.	Aus (WA)
Yamarna - Atilla	100%	Au	none	ox/sulp	heap leach	Adv. Expl.	Aus (WA)
Yamarna - Gold regional	100%	Au	none	ox/sulp	na	Early Expl.	Aus (WA)
Golden Sands	100%	Au,U	none	ox/sulp	na	Early Expl.	Aus (WA)
Yamarna: Thatcher Soak	100%	U	none	Calcrete	Alk. Leach	Adv. Expl.	Aus (WA)

The initial Central Bore JORC resource is 150koz Au, open to the north and at depth. The planned major 2011 drilling campaign focusing on Hann, Justinian and other parallel zones suggests that the upper level of our valuation range (A\$0.56/share) could be coming into focus if the good results keep flowing.

GOLD ROAD RESOURCES LIMITED - VALUATION

	Equity	Target	Valuation Range		
		Gold Resource (moz)	Low * A\$m	Mid** A\$m	High ^ A\$m
Projects					
+ Yamarna existing gold resource (current 0.92moz valued @ A\$40-A\$50/oz)	100%	0.92	36.7	45.9	45.9
+ Central Bore (current 0.15moz high grade resource valued @ A\$200-A\$250oz)	100%	0.15	30.0	37.5	37.5
+ Justinian, Hann, Byzantium, CB North - likely new parallel high grade zones	100%		15.0	37.5	60.0
+ Thatcher Soak uranium resource (6.2mlb @ A\$0.50/lb)	100%		3.1	3.1	3.1
+ Yamarna 4,000km ² Regional Expl'n (excellent potential for further h.g. zones)	100%		15.0	20.0	25.0
+ Other Exploration (Uranium potential, Golden Sands Au)	100%		2.0	3.0	5.0
Sub Total			101.8	147.0	176.5
+ Cash (est Mar '11)			9.4	9.4	9.4
- Debt (est. Mar '11)			0.0	0.0	0.0
Sub Total			9.4	9.4	9.4
GOR NET ASSET VALUE			111.2	156.4	185.9
Capital Structure					
Shares (m)			273.8	273.8	273.8
Fully Diluted Shares (m)			333.8	333.8	333.8
GOR NET ASSET VALUE PER SHARE	:A\$/share		0.41	0.57	0.68
GOR NET ASSET VALUE DILUTED	:A\$/share fully diluted		0.34	0.48	0.56

* Low valuation assumes little 2011 exploration success - new high grade parallel discovery zones valued at 50% of Central Bore valuation.
 ** Mid valuation assumes modest 2011 exploration success - new high grade parallel discovery zones valued at equal to Central Bore valuation.
 ^ High valuation assumes continued 2011 exploration success - multiple new high grade parallel discovery zones valued at a 60% premium to Central Bore.

The new high grade discovery zones occur in a small 6 km² segment, out of GOR's total ~5,000 km² Yamarna greenstone belt tenements, which remain relatively unexplored due to remoteness and soil cover.

RCR, its affiliates and their respective officers, directors and employees may hold positions in the securities of the companies featured in this report and may purchase and/or sell them from time to time and RCR and its affiliates may also from time to time perform investment banking or other services for, or solicit investment banking or other business from, entities mentioned in this report. Gold Road Resources Limited (“the company”) commissioned RCR to compile this report. In consideration, RCR received from the company a cash consultancy fee of less than \$15,000. RCR may receive referral fees from issuing companies or their advisors in respect of investors that RCR refers to companies looking to raise capital. Those fees vary, but are generally between 0 - 1% of the value of capital raised from referrals made by RCR. RCR received referral fees in relation to recent capital raisings for Globe Uranium Limited, PepinNini Minerals Limited, Uranex NL, Adamus Resources Limited and Toro Energy Limited. RCR expects to receive an introductory fee for a mandated capital raising in relation to Cobar Consolidated Resources Limited. At the date of this report, neither RCR, nor any of its associates, hold any interests or entitlements in shares mentioned in this report with the exception that either or both of John Wilson (either directly or through Resource Capital Investments Pty Limited (RCI)) and associates, or RCI, as trustee of the Resource Capital Investments Fund owns shares in Adamus Resources Limited, Ampella Mining Limited, Axiom Mining Limited, Echo Resources Limited, Gold Road Resources Limited, Gryphon Minerals Limited, Newcrest Mining Limited and Signature Metals Limited.

Analyst Certification: All observations, conclusions and opinions expressed in this report reflect the personal views of RCR analysts and no part of the analyst’s or RCR’s compensation was, is, or will be, directly or indirectly related to specific recommendations or views expressed in the report. Officers, directors, consultants, employees and independent contractors of RCR are prohibited from trading in the securities of U.S. companies that are, or are expected to be, the subject of research reports or other investment advice transmitted to RCR clients for a blackout window of 14 days extending before and after the date such report is transmitted to clients or released to the market.

Cautionary Note to U.S. Investors Concerning Estimates of Measured, Indicated and Inferred Resources: RCR publishes mineral resources based on standards recognized and required under securities legislation where listed mining and exploration companies make their exchange filings and uses the terms “measured”, “indicated” and “inferred” mineral resources. U.S. investors are advised that while such terms are recognized and required under foreign securities legislation, the SEC allows disclosure only of mineral deposits that can be economically and legally extracted. United States investors are cautioned not to assume that all or any part of measured, indicated or inferred resources can be converted into reserves or economically or legally mined. We recommend that US investors consult Securities and Exchange Commission Industry Guide 7 – “Description of Property by Issuers Engaged or to Be Engaged in Significant Mining Operations” for further information about the use of defined terms and the presentation of information included in this report.
