Important Notices

Nature of this document: The purpose of this presentation is to provide general information about Gold Road Resources Limited (the 'Company'). Unless otherwise stated herein, the information in this presentation is based on the Company's own information and estimates. In attending this presentation or viewing this document you agree to be bound by the following terms and conditions.

Not an offer: This presentation is for information purposes only and does not constitute or form any part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, any securities in the Company in any jurisdiction. This presentation and its contents must not be distributed, transmitted or viewed by any person in any jurisdiction where the distribution, transmission or viewing of this document would be unlawful under the securities or other laws of that or any other jurisdiction.

Not financial product advice: This presentation does not take into account the individual investment objectives, financial situation and particular needs of each of the Company's Shareholders. You may wish to seek independent financial and taxation advice before making any decision in respect of this presentation. Neither the Company nor any of its related bodies corporate is licensed to provide financial product advice in respect of the Company's securities or any other financial products.

Forward-looking statements: Certain statements in the presentation are or may be "forward-looking statements" and represent the Company's intentions, projections, expectations or beliefs concerning, among other things, future operating and exploration results or the Company's future performance. These forward looking statements speak, and the presentation generally speaks, only at the date hereof. The projections, estimates and beliefs contained in such forward looking statements necessarily involve known and unknown risks and uncertainties, and are necessarily based on assumptions, which may cause the Company's actual performance and results in future periods to differ materially from any express or implied estimates or projections.

Disclaimer: No representation or warranty, express or implied, is made by the Company that the material contained in this presentation will be achieved or prove to be correct. Except for statutory liability which cannot be excluded, each of the Company, its directors, officers, employees, advisers and agents expressly disclaims any responsibility for the accuracy, fairness, sufficiency or completeness of the material contained in this presentation, or any opinions or beliefs contained in this document, and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this presentation or any error or omission there from. The Company is under no obligation to update or keep current the information contained in this presentation or to correct any inaccuracy or omission which may become apparent, or to furnish any person with any further information. Any opinions expressed in the presentation are subject to change without notice.

Unverified information: This presentation may contain information (including information derived from publicly available sources) that has not been independently verified by the Company.

Capital Structure

	A\$	US\$
Issued Shares	871M ¹	
Performance Rights	7.9M ¹	
Unlisted Options	3.8M ¹	
Market Cap	\$625M ²	\$465M ³
Cash & Equivalents	\$326M ^{1,4}	\$243M ³

¹ As at 31 March 2017

² As at 19 May 2017, based on last close price of A\$0.717 per share

³ Based on an exchange rate as at 18 May 2017 of A\$1.00:US\$0.7447

⁴ As at 31 March 2017, the Company had A\$415.9 million in cash, term deposits and current receivables

Gold Fields substantial holding – May 2017

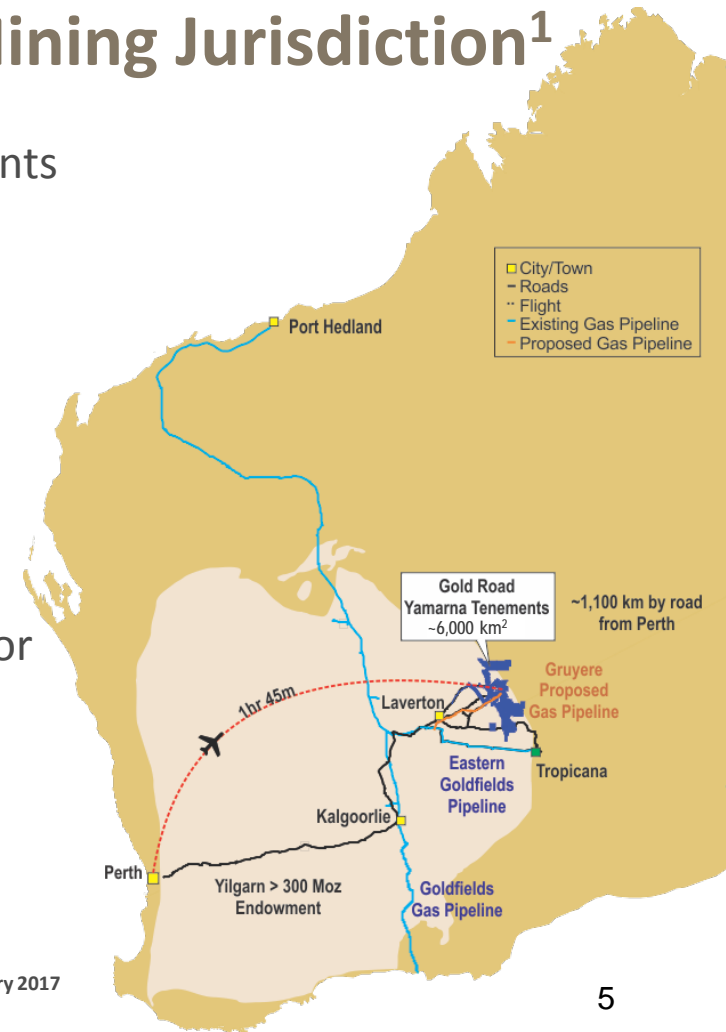

- Gold Fields became substantial shareholder 18 May
- 10% (87.1M shares) ownership capped by standstill
 - 12.8M shares at 52.5c on 15 March 2017
 - 74.3M shares at 86c on 18 May 2017 purchased from RCF
 - May transaction at 27% premium to prevailing share price
- Standstill in place under Gruyere JV Agreement
- Gold Fields restricted to maximum 10% shareholding, until earlier of:
 1. Two years after GFA or its affiliates cease to be a participant in the Gruyere Project Joint Venture;
 2. A person or persons jointly or in concert (other than GFA or its affiliates), publicly announce their intention to commence a transaction which would result in a person or persons acquiring a relevant interest of 20% or more in Gold Road's issued shares (Control Transaction); or
 3. The date Gold Road publicly announces that its Board of Directors has approved an agreement which contemplates a Control Transaction.

ASX Announcement
19 May 2017

**27% PREMIUM PAID
BY GOLD FIELDS TO
INCREASE HOLDING IN
GOLD ROAD TO 10%**

World Class Gold Mine in a Top 3 Mining Jurisdiction¹

- ~6,000 km² of highly prospective exploration tenements
- Joint Venture Partner in the Gruyere Gold Project
 - **6.16 Million Ounce** total **Gruyere** Mineral Resource
 - **3.52 Million Ounce** total Gold Ore Reserve
 - 13 year mine life at **>270 koz per year annualised**
 - **A\$945/oz** (US\$690/oz²) AISC - High Margin potential
- JV Partner Gold Fields Ltd a proven Australian operator
- Project under construction
- Fully funded to production and for exploration
- A\$30M Greenfields exploration programme for 2017

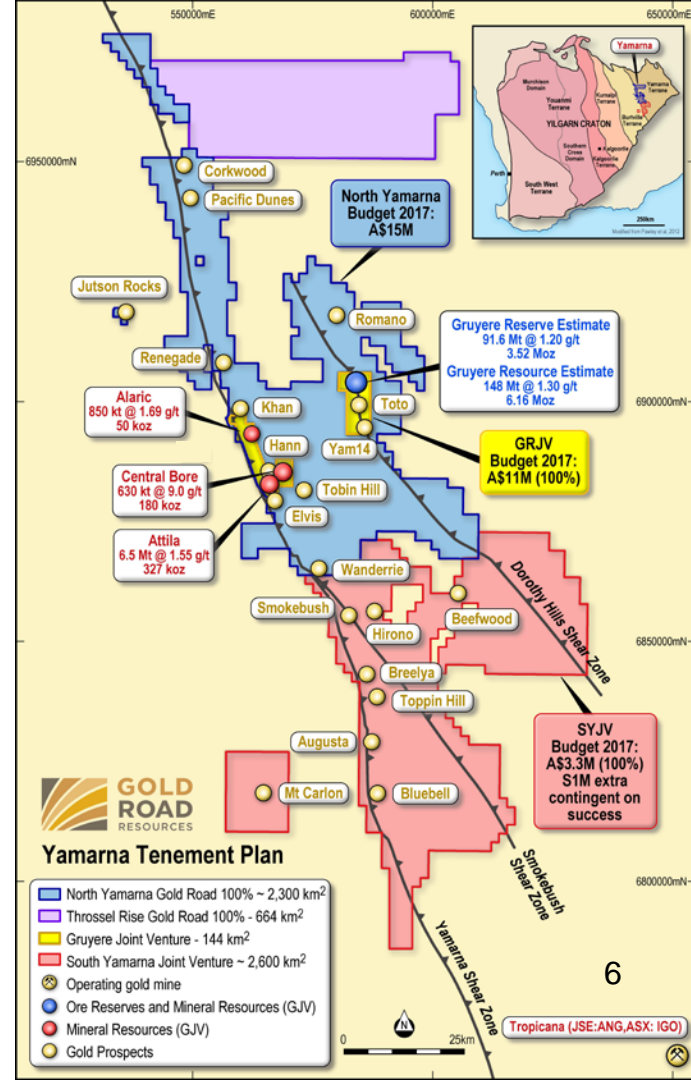

¹ Western Australia ranks as the number three mining jurisdiction in the annual **Fraser Institute Mining Survey 2016 – February 2017**

² Exchange rate of **A\$1.00:US\$0.73** as per **Feasibility Study** (ASX announcement on 19 October 2016)

The Appeal of Gold Road

- Top 10 Australian Reserve and Resource base
- Gruyere the longest life pure gold mine in Australia
- Fully funded near term producer
- Proven global operator as JV partner
- A\$100M cash excess to construction commitment
- Immediate debt free cash flow on production
- Potential to pay dividend after Year 1 production
- Majority owner of Yamarna exploration leases
- Undervalued stock with multiple growth avenues

The Gold Road Value Proposition

Investment Appeal

- Fully funded near term producer
- Long-life low-cost gold production
- World class exploration tenement
- Undervalued share price
- Low risk project and jurisdiction

Gruyere JV

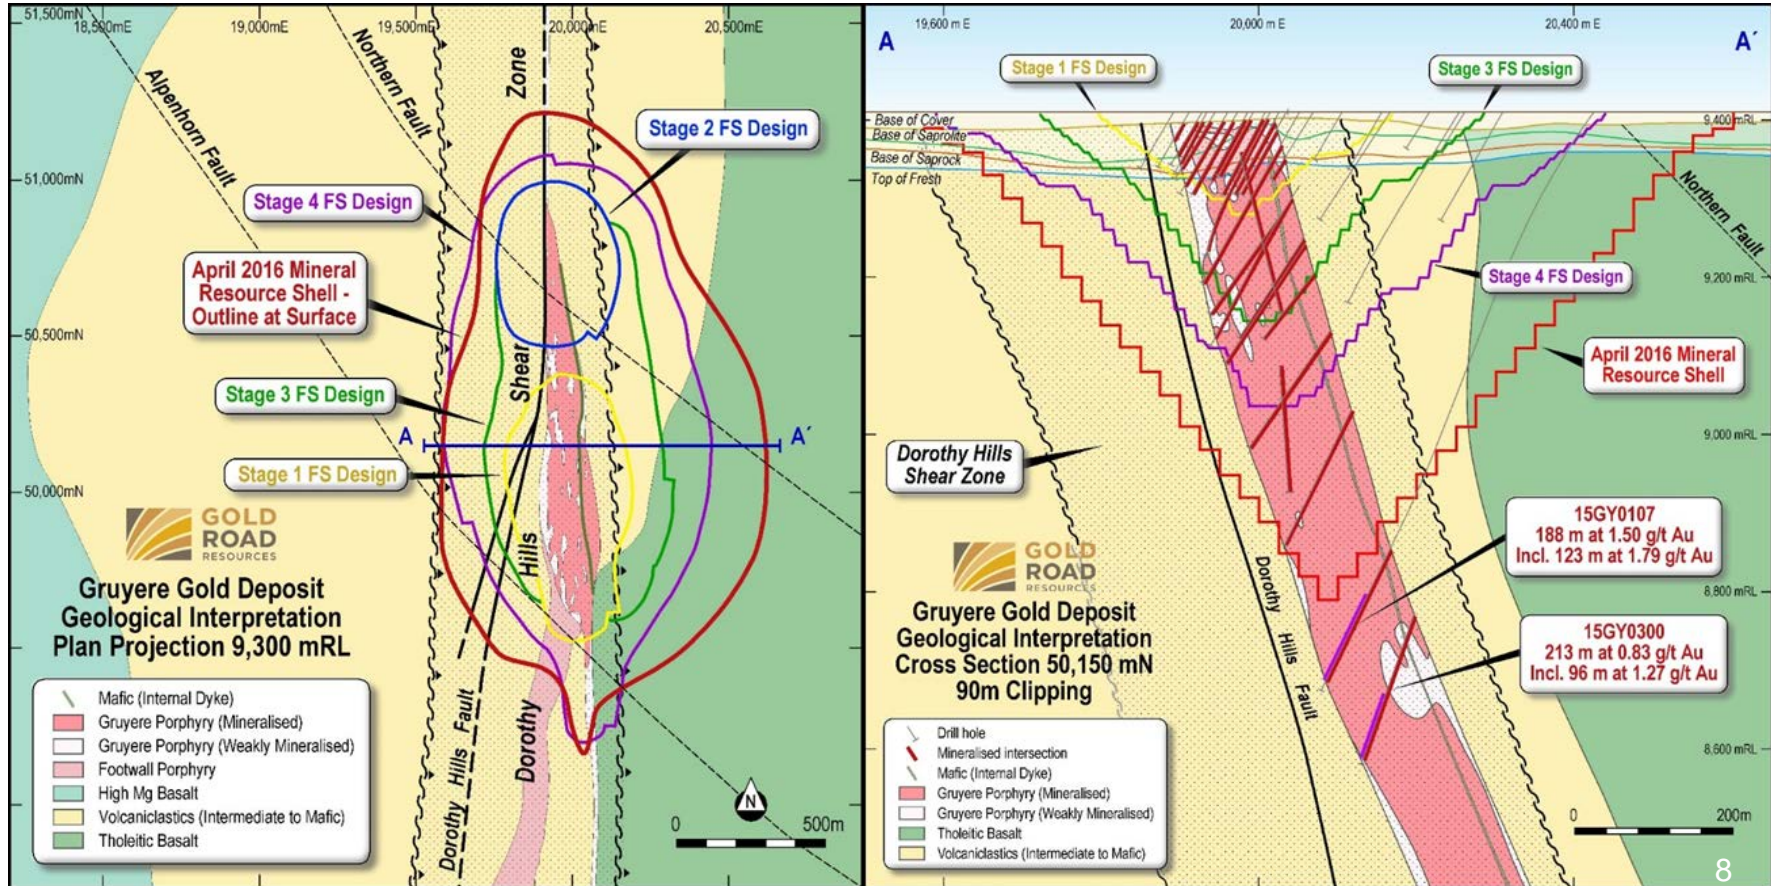

- 1.8 Moz Reserve (Gold Road share)
- 3.4 Moz Resource (Gold Road share)
- 13 year mine life
- Fully funded to production
- >130 kozpa within 2 years
- Substantial free cash generator

Yamarna Exploration

- ~6,000 km² Tenements
- Immature exploration history
- 100% North Yamarna Project
- 50% Gruyere JV Project
- 50% South Yamarna JV Project
- Proven “elephant” country
- A\$30M budget for 2017

Gruyere Deposit – Simple Geology, Single Mine

The Quality of Gruyere - External Endorsement

Project Finance

- 12 banks in starting process
- 7 banks in final shortlist
- 6 Term Sheets submitted
- **Potential to provide A\$400M**

Joint Venture

- 11 Companies invited
- Australian and Global companies
- Major and Mid Tier operators
- 4 companies in final bids
- **Gold Fields paid A\$350M for 50%**
- 1.5% NSR >2Moz captures upside

Independent Technical Expert

- ITE review of Feasibility Study
- SRK appointed by Banks
- **Reported no Fatal Flaws**
- **Commented on low risk of project**
- Commended quality of study

*The company has sufficient cash to meet development costs of the project (A\$514m on a 100% ownership basis) whilst continuing to explore the Yamarna belt. **We have a preference for GOR as an Australian based gold developer**, due to its funding position, exploration upside as well as potential for the company to be included within the GDXJ index upon reweight.*

P Hissey, RBC - 7 March 2017

With Gold Fields now on board as a JV Partner and Project manager going forward, we see an appreciable likelihood for Gruyere to enter production in less than 2 years... Gold Road is not resting on its laurels with Gruyere, and are looking to use their strong balance sheet and expansive foothold within the Yamarna Gold Belt to deploy around A\$22 million on exploration projects

G Mark, Haywood Securities – 15 February 2017

***New gold miner has visible path to profitability:** Gold Road joins Evolution Mining and Perseus Mining as Overweight-rated gold miners in our coverage. We view Gold Road as a project delivery and exploration play, with both aspects capable of lifting the equity price. Encouragingly, it already has funding for its key project, the Gruyere mine.*

B Fitzpatrick, Morgan Stanley – 11 January 2017

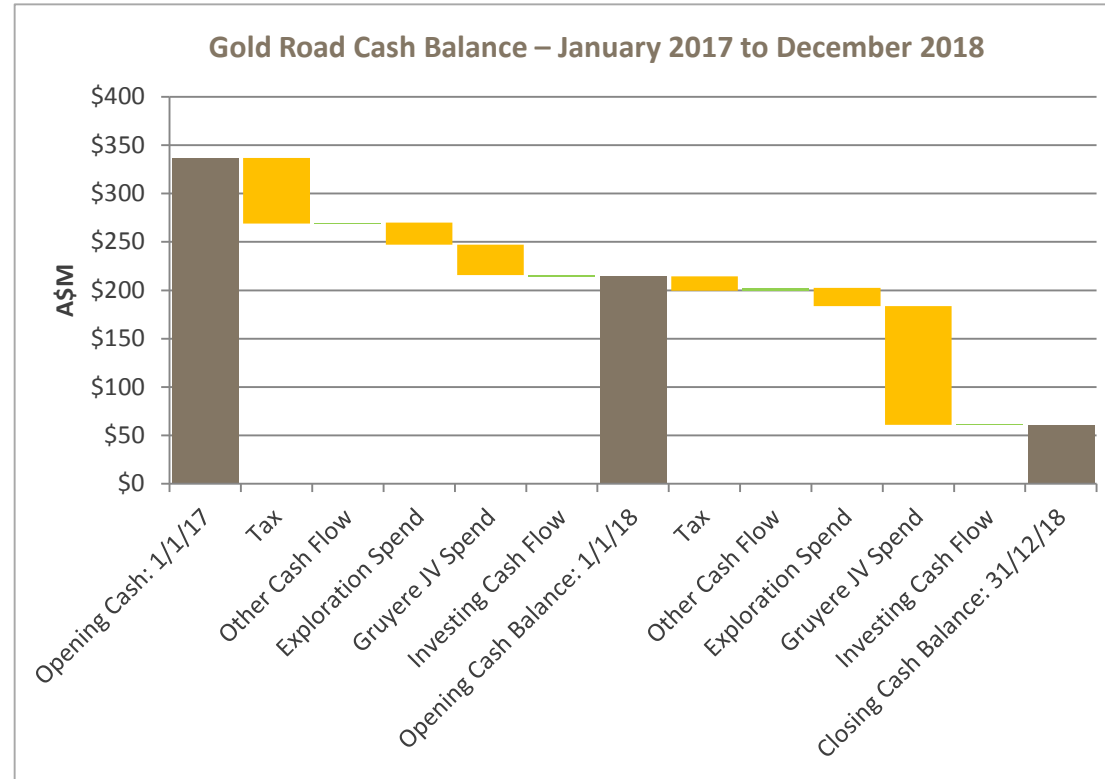

Against the Aussie golds, Gruyere has a stand out mine life

***JV with Gold Fields sees free carry and funded to production.....** Argonaut believes the deal de-risks the construction of Gruyere by partnering up with a globally recognised and experienced gold producer.*

J Wilson, Argonaut - Best Undeveloped Projects, December 2016

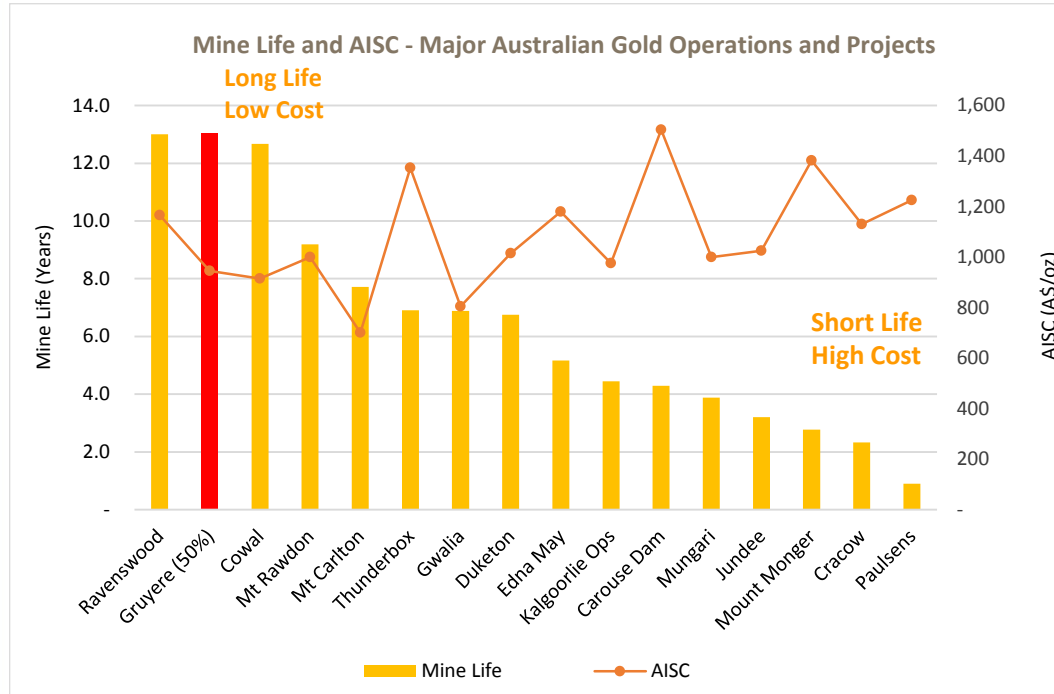

Gold Road Use of Proceeds – 2017 to 2018

- Gold Road cash allocation:
 - Gruyere project construction
 - Gruyere JV exploration
 - North Yamarna exploration
 - South Yamarna JV exploration
 - Corporate cost
 - Tax payments on JV transaction
 - Tax on profit from forward sales
 - Income from cash investment
- Closing balance at completion of construction of ~A\$50M
- Allows accelerated aggressive exploration
- Ensures appropriate working capital

Gruyere in the Australian Space

True Greenfields Development - Long-life, Low-cost Asset

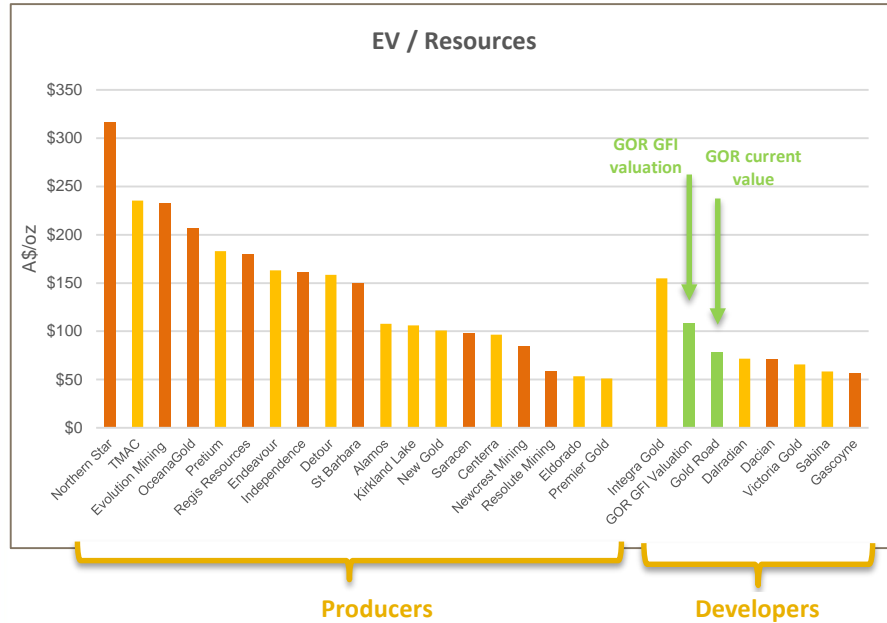

- Versus ASX mid-tier gold peers Gruyere is:
 - Equal longest mine life
 - Projected lowest quartile cost of production
 - Is a low risk, brand new gold development
- Projected to be a long life cash producer
- Fully funded and highly de-risked
- Construction is advancing to schedule
- Substantial exploration upside remains
 - Gruyere Underground project
 - No value ascribed to Attila Trend Resources

Data compiled by RBC Capital - Source: Company filings and Capital IQ

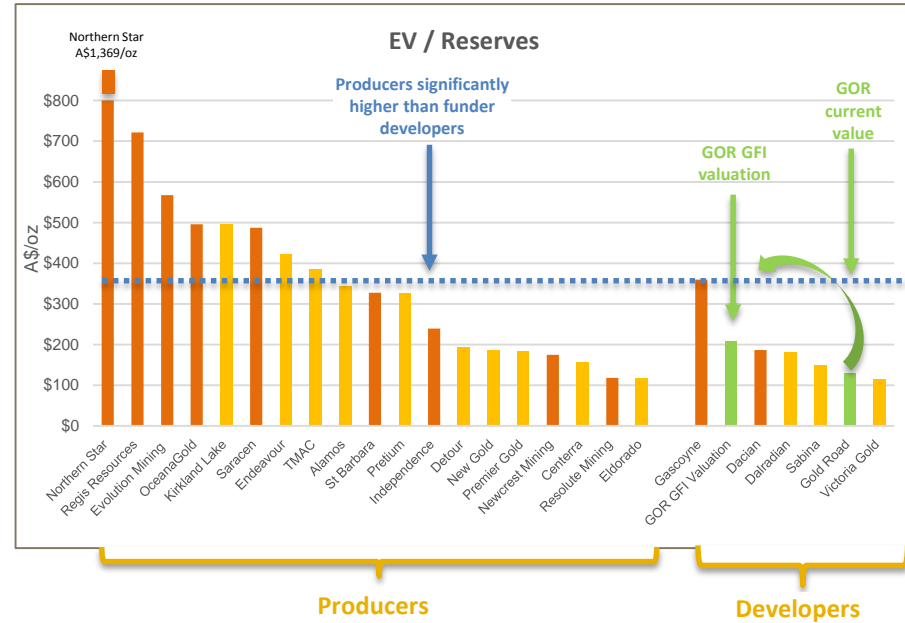

Note: Mine life and AISC forecasts based on company guidance and broker research where disclosed. Otherwise Mine life calculated as total reserves divided by FY17 production forecast. For Gold Road (GOR) mine life and AISC are LOM averages.

EV Ratios in Global Perspective

GOR moderately valued on Funded EV/Resource basis

GOR significantly undervalued on EV/Reserve basis

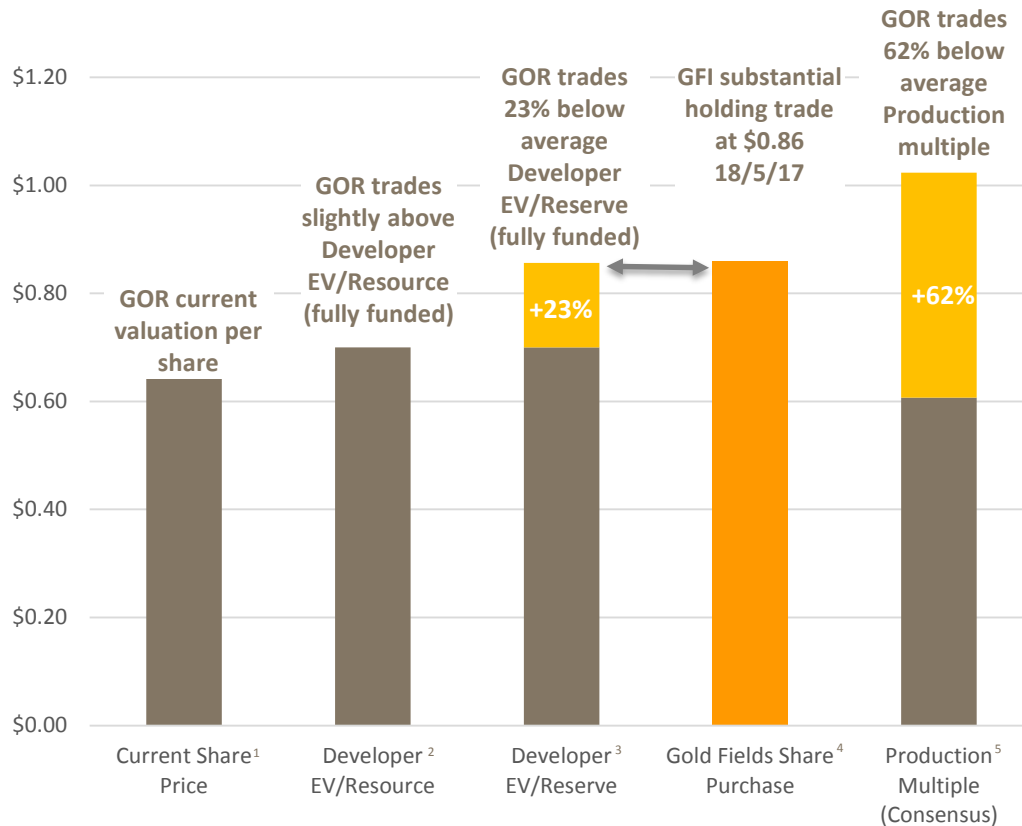

EV is based on closing share prices on 18/05/17 and converted to A\$ based on the spot exchange rate and cash and debt converted to A\$ based on A\$1.00:US\$0.75 and C\$1.02:A\$1.00, where necessary. Cash, reserves and shares issued as disclosed in Quarterly activity reports available as at 21/4/2017, except DCN and GCY which are based on company filings following recent capital raisings

Resource and Reserve statistics sourced from company filings or Capital IQ

GOR GFI valuation based on A\$350M cash paid plus a valuation of A\$15M for the GFI royalty

Potential Re-rate of Share Price – Multiples

- Gold Road has significant share price upside just by doing what we say we will do:
“Build the Gruyere Project with our JV Partner”
- Exploration remains as true upside

¹ Share Price A\$0.675 at 18/5/17

² Developer EV/Resource fully funded average multiple is A\$112/oz (DCN and GCY) compared to current A\$154/oz for GOR

³ Developer EV/Reserve fully funded average multiple is A\$373/oz (DCN and GCY) compared to current A\$294/oz for GOR

⁴ Production Multiple median is 1.09 of NAV, compared

⁵ Production Multiple median is 1.09 of NAV, compared to 0.65 for Developer. Consensus NAV of A\$831M based on average of 7 brokers. Median based on comparable set of 8 ASX listed companies (NCM, OGC, RRL, EVN, NST, SBM, SAR, RSG)

Gruyere Joint Venture

- Gold Road & Gold Fields Ltd 50:50
- 13 year mine life at >270koz pa
- Low cost production from 2018
- GOR fully funded to production
- Managed by proven world class operator

Construction of infrastructure underway

"Unlocking The Potential"

"Our vision is to be the global leader in sustainable gold mining"

Gruyere Joint Venture Update

- Gruyere Village due for completion June 2017
 - 630 rooms available for construction start-up
- Plant EPC awarded to ACJV
 - Engineering optimisation workshops completed
 - Detailed design in progress
 - Secured Mills – 8.5 Mtpa capacity
 - Mobilise personnel to site July 2017
- Bulk Earthworks awarded to MACA
 - Mobilise personnel to site June 2017
- Power BOO Contract essentially finalised
 - Gas and Power infrastructure construction to commence Q3 2017
- Preparation of Mining Tender in progress

Gruyere Construction Progress

Water bore drilling, Anne Beadell Bore Field

Waste water pond from RO Plant

Installation of borefield pipelines along Anne Beadell infrastructure corridor

Erecting communications tower at Gruyere Village

Gruyere Development Schedule

Dec Q
2018

	Q1	Q2	Q3	Q4	Q5	Q6	Q7	Q8	
Project Funding	★	Project Funding via Gruyere JV with Gold Fields ✓							★ Complete Construction in 2018
Permits & Approvals	★	Permits received and Approvals in place ✓							
EPC Construction ¹	EPC contract awarded ★	Engineering, Construction, Commissioning – Processing Plant and Infrastructure							★
Bulk Earthworks ²	Bulk Earthworks, Roads & Airstrip			Tailings Dam Construction					
Gas Pipeline and Power ³	Approvals		Construction of Pipeline and Power Station						
Mining Contract ⁴	Tender and Award			Pre-strip and mine development					★ First gold late 2018
Operations							Commence Mining	★ First gold late 2018	

1. EPC awarded to AMEC-Foster Wheeler/Civmec JV as a Fixed Price Lump Sum contract. 100% of steel work to be manufactured at Civmec Henderson facility in Western Australia (ASX announcement dated 3 April 2017)

2. Bulk Earthworks awarded to MACA (local WA mining and civils contractor) as a Schedule of Rates contract (ASX announcement dated 3 April 2017)

3. Power contract will be awarded as a BOO contract to a selected experienced Australian power provider – contract to be finalised by June 2017 (ASX announcement dated 3 April 2017)

4. Mining contract tender being prepared to be awarded in H2 2017

★ Major planned decision points and milestones based on best case schedule

Future Exploration

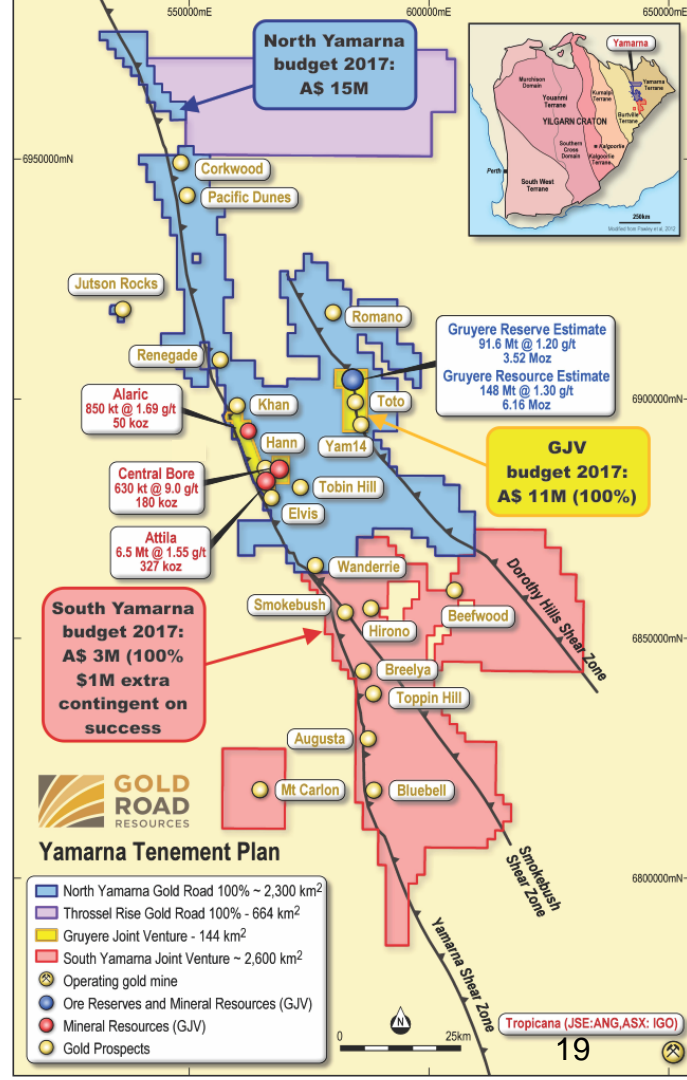

- Total A\$30M Budget for 2017
- Accelerate North Yamarna exploration
- Follow-up two years Regional testing
- Focus on discovery of standalone deposits
- Target 2 Moz deposits on South Yamarna JV
- High margin Reserve focus for Gruyere JV

Yamarna Exploration Camp – January 2017

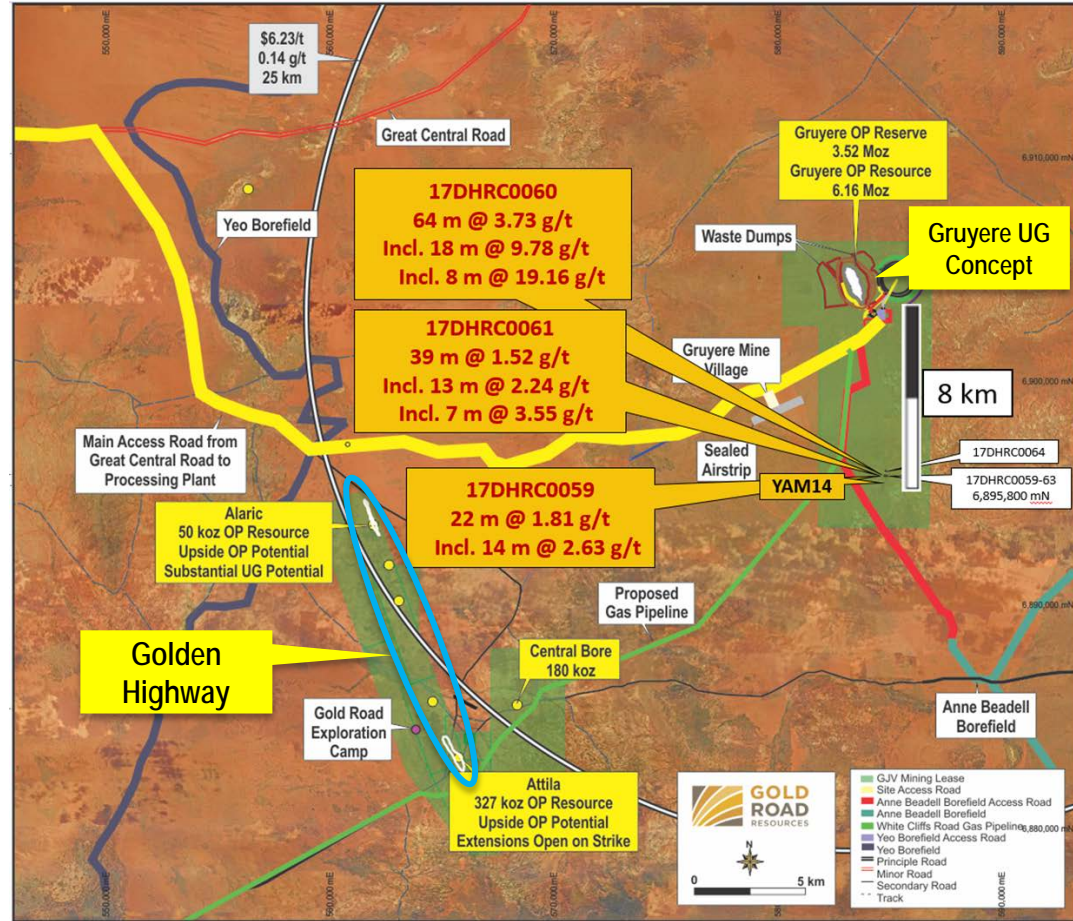

A\$30M Greenfields Budget

- Largest Greenfields gold project in Australia
- 2017 total exploration budget of A\$30M
 - A\$15M on 100% owned North Yamarna Project
 - A\$11M on 50:50 Gruyere Joint Venture
 - A\$3.3M on 50:50 South Yamarna Joint Venture
- North Yamarna – 100% Gold Road
 - Aggressive bed rock testing of prioritised targets
 - Infill aircore on priority anomalies
 - Targeting at least one major discovery in 2017
- South Yamarna JV – targeting >2 Moz under deeper cover
 - Regional aircore over southern Dorothy Hills extension
 - Aircore and RC testing of identified anomalies
- Gruyere JV – High margin reserves and extend mine life
- New Throssel Rise Project under application – 100% Gold Road

Growing the Gruyere JV – Exploration

- Attila-Alaric Trend – The Golden Highway
 - 14km of prospective trend
 - 557 koz Resource so far
 - At least 4 other known deposits
 - Planning extensive new drilling
 - Update all models
- Attila South
 - 327 koz OP Resource (A\$1,850/oz)
 - Successful extension drilling 2016
 - Targeting Maiden Reserve H2 2017
 - Upside at depth and on strike
- Alaric
 - 50 koz OP Resource (A\$1,600/oz)
 - Updated Resource H2 2017
 - Targeting Maiden Reserve H2 2017
 - Depth extension drilling in progress

Growing the Gruyere JV – The Golden Highway

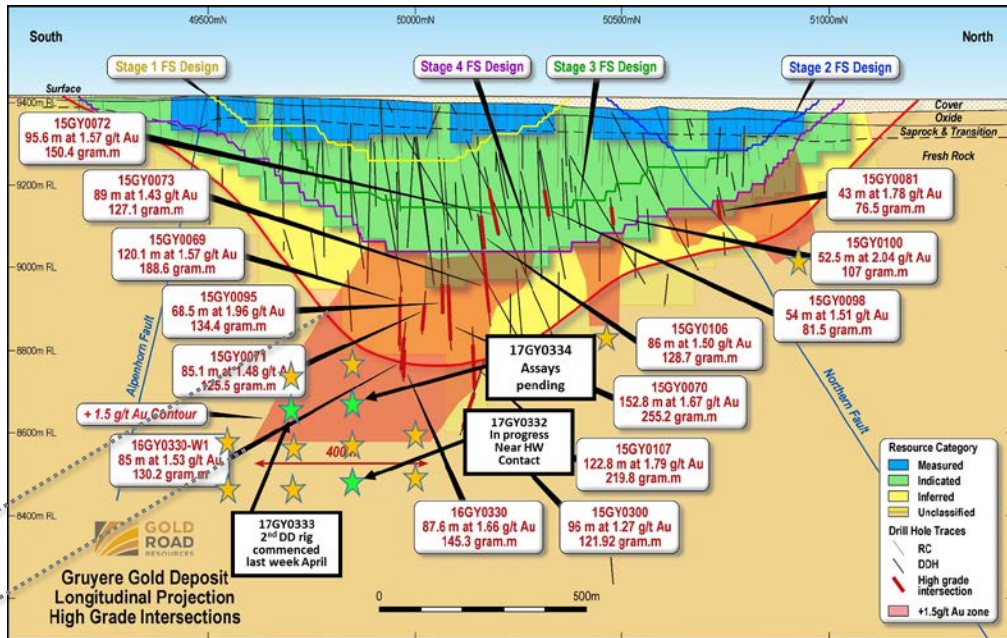

Growing the Gruyere JV – YAM14

- High grade potential at Dorothy Hills
- 8km south of Gruyere Mill site
- 1km strike of shallow gold mineralisation
- Open along strike and at depth
- High grade mineralisation recently intersected
 - 18m @ 9.8 g/t Au within 64m @ 3.7g/t
- Structural controls to be determined
- Shoot orientations to be drill tested
- Drilling commencing in June 2017
 - Extensional targets on dip and strike
 - Infill to resource status
- Follow-up targets between Gruyere and YAM14

Gruyere Underground Concept

- Underground Mining Potential
 - 2015 Conceptual mining study confirmed underground mining is possible given dimensions of ore body
 - Assumed Sub Level or Panel Caving methods
 - Drilling 4 holes to assess higher grade trend – 3800m
 - If positive then drill frame work for Inferred Resource

Gruyere Longitudinal projection illustrating Ore Reserve pit (purple outline) and constraining Mineral Resource shell (red outline) relative to central higher grade shoot targeted for potential underground extension. Budget of A\$4M allocated to drill testing (green and yellow stars represent planned drill intersections) extension to the interpreted shoot (500m strike by 400m dip extent, 90m average width at 1.7g/t Au) targeting Resource update and Scoping Study by December Quarter 2017. Hole 17GY0334 completed April 2017. Holes 17GY0332 and 17GY0333 in progress with two drill rigs operating.

North Yamarna Top 5 Bedrock Testing Priority Targets

- Bedrock testing the highest priority targets
- Regularly update project priorities to focus on best targets
- Progress at least one target to Resource drilling in 2017
- One DD and one RC rig currently operating

Current Top 5 Targets ready for drilling

- Ibanez - Corkwood Camp (#3) – Tested, assays pending
 - Bedrock mineralisation defined over 2 km strike in broad RC-DD drilling
 - Multiple structures and prospective lithologies
- Washburn - Corkwood Camp (#3)
- Santana – Wanderrie Camp (#4) – RC and DD tested
 - High-grade bedrock structure in Kundana-analogue geology
- Gallagher – Wanderrie Camp (#4) – first DD completed
 - Broad gold anomalism coincident with thick dolerite stratigraphy
- Tobin Hill Camp (#2) – first DD completed
 - Multiple high priority early stage targets in favourable structural setting

Ibanez Target Example¹

Aircore Test to Bedrock Target

Ibanez
 Au-As-Ag anomaly in shear complex – possibly overturned to west, with felsic intrusives in mafic package
Gold in bedrock confirmed

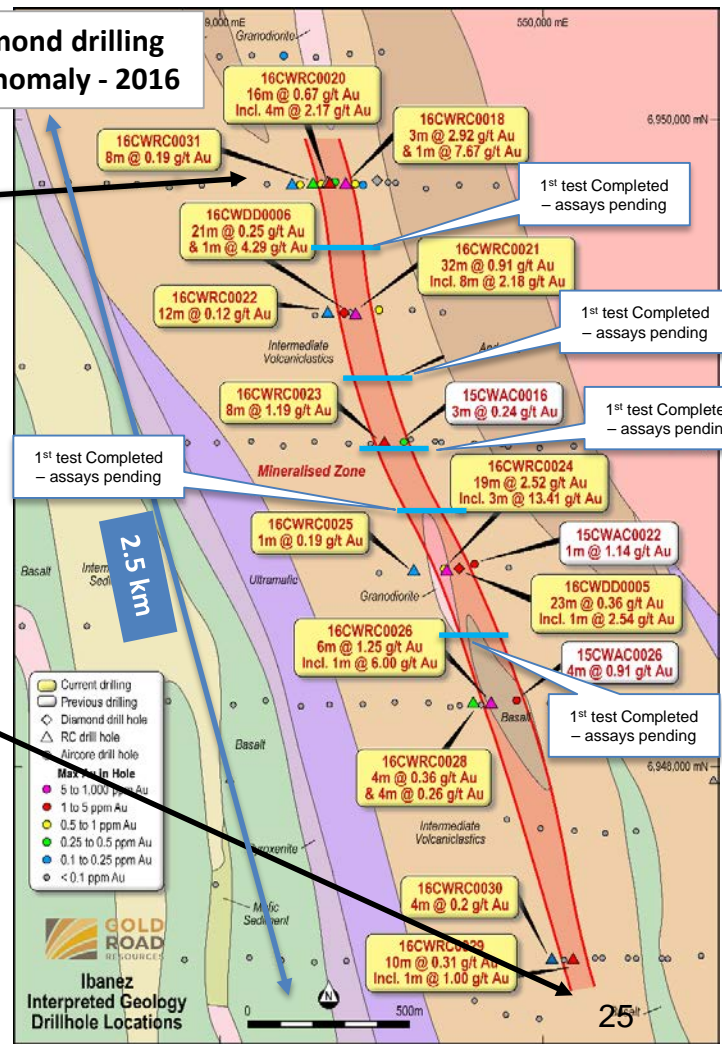

Washburn
 Au-Ag-Mo-Bi at sheared contact of major felsic intrusive with cross cutting structure
 As in hangingwall suggests reduced fluids
Gold in bedrock confirmed

Initial reconnaissance aircore programme – 2015/16

Mesaboogie
 Infill aircore drilling in progress to refine >3km long anomaly identified in 2014

RC and Diamond drilling of aircore anomaly - 2016

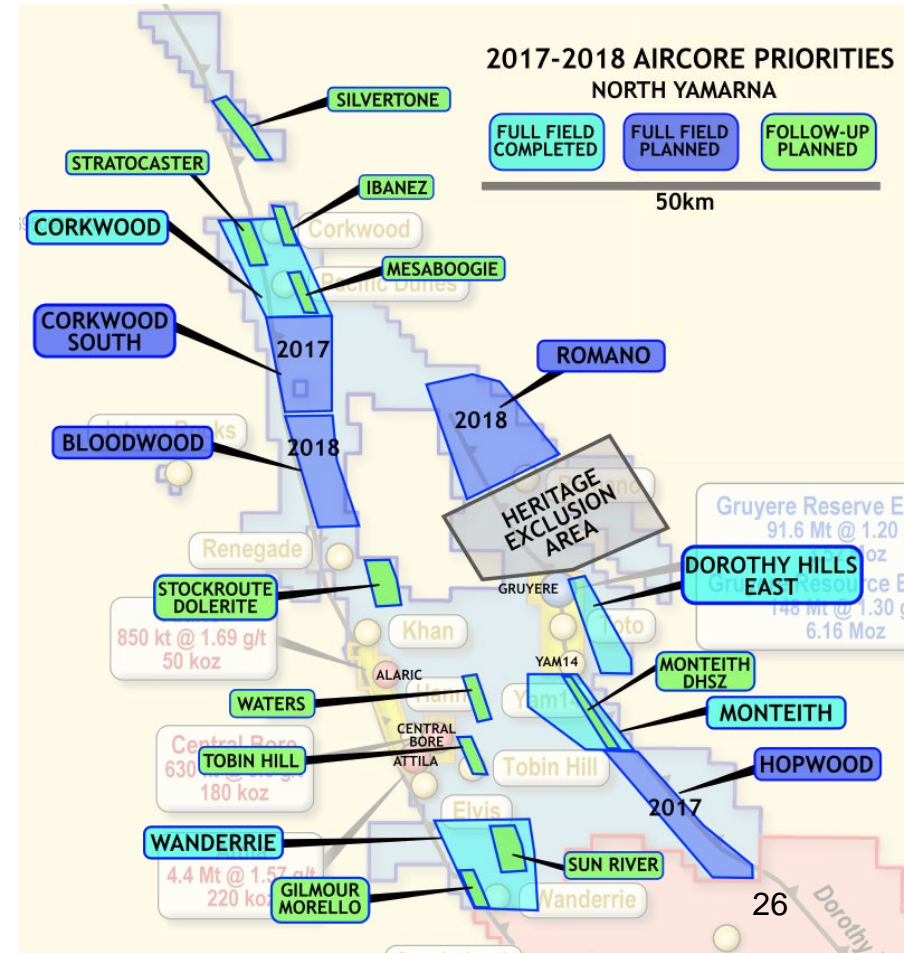

¹ ASX Announcement on 17 January 2017

North Yamarna Full Field Aircore

Camp Scale Target Testing

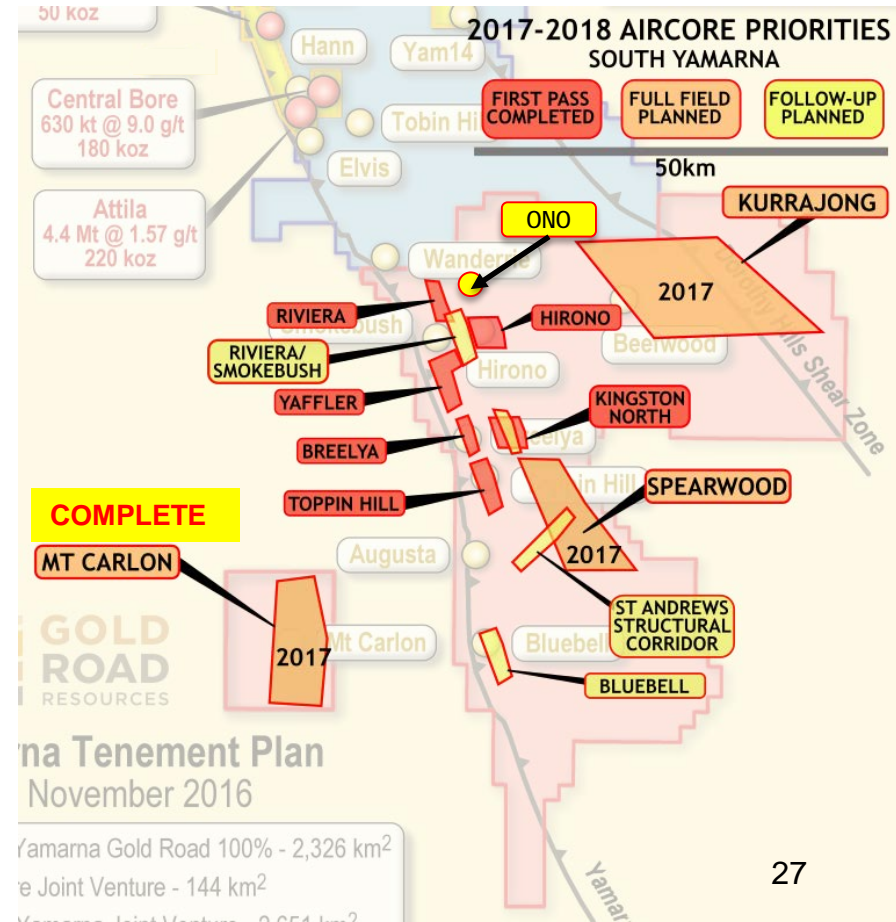

- Full Field Aircore
 - Systematic aircore over all Camp Scale Targets by 2019
 - Near completed on 3 of 7 Camp Scale Targets
 - Reconnaissance framework on 2 camps in 2017
 - Finalise reconnaissance on remaining 2 camps in 2018
 - Continue infill of identified priority anomalies
 - Generate Bedrock Drill Targets – replenish the pipeline
- Aim: Identify footprint consistent with >1Moz deposit
- Two aircore rigs currently operating

South Yamarna 2017

Reconnaissance over New Camps

- Target Testing
 - Bedrock drilling into identified prospects
 - Confirm mineralisation below anomalies
- Top 3 Targets
 - Kingston North – 2.5km aircore anomaly in structural complex
 - Yaffler South – 1.8km aircore anomaly in shear corridor
 - Ono – AC Test conceptual Stage 2 Target
- Full Field Aircore
 - Systematic aircore over all Camp Scale Targets by 2019
 - Partial testing of 3 of 6 Camp Scale Targets
 - Complete reconnaissance framework on 2 camps in 2017
- Aim: Identify footprint consistent with 2 Moz deposit
- Aim: Framework drilling on at least one target

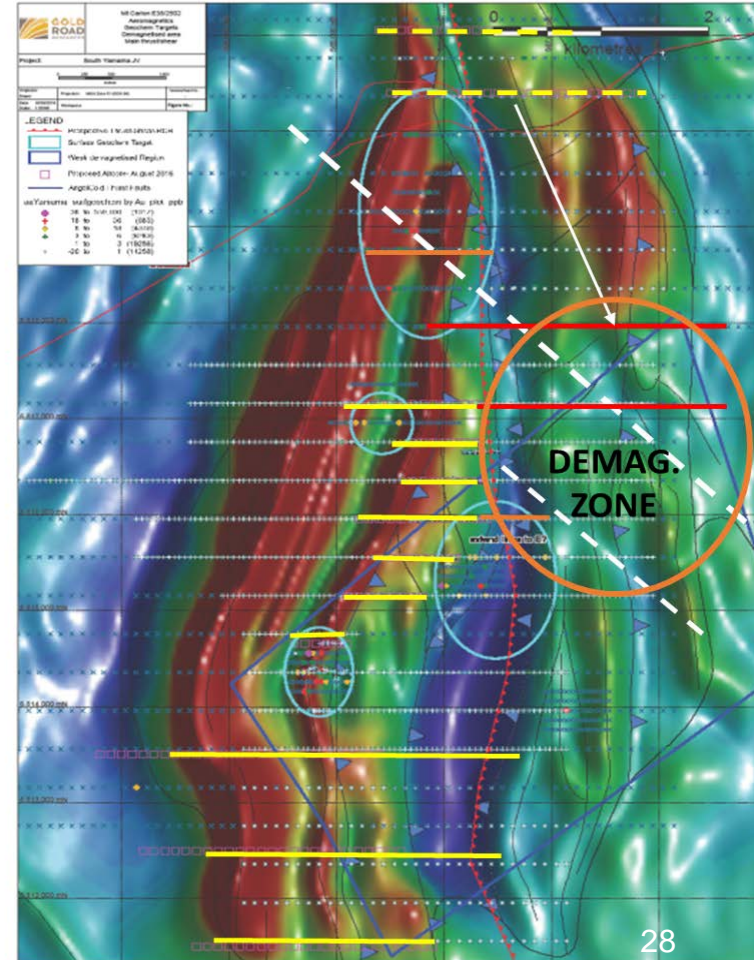

South Yamarna 2017

Mt Carlon Camp Scale Target

- Small (20 x 10km) Greenstone Belt west of Yamarna
- Folded and thrust sequence of sediments/ dolerite/ basalt/ BIF/ ultramafic and felsic intrusive units
- Demagnetised BIF's interpreted as mineralised cross cutting shears
- Hill 50 analogue – Target potential >2 Moz
- Initial programme of 200 AC holes just completed – assays pending

Subcrop/outcrop and surface float Banded Iron Formation (BIF) with quartz veining (Left and middle), and quartz vein sample (right) showing weathered sulphides after pyrite-galena observed during recent mapping

2017 Planned Exploration

NORTH YAMARNA 100% GOLD ROAD

A\$15M

132,000m AC
42,000m RC
13,800m DD

GRUYERE JOINT VENTURE 50:50

A\$11M

5,000m AC
27,800m RC
21,750m DD

SOUTH YAMARNA JOINT VENTURE 50:50

A\$3.3M

30,000m AC
7,500m RC

H1 2017

H2 2017

167,000m AC
77,300m RC
35,500m DD

The Gold Road Value Proposition

- Fully funded World class development project
- Gruyere is long life, large scale, low risk, low cost
- Highly prospective exploration tenement
- Fully funded A\$30M exploration programme
- Largest Greenfields Gold project in Australia
- Self-sustaining future funding
- Team capability in exploration and projects
- Potential for growth AND future dividends
- A low risk gold investment with huge upside!
- A unique investment opportunity

One of the lowest risk, lowest cost Global gold investments

**THANK
YOU**

Appendices 1 to 3

- Competent Persons Statements
- Mineral Resource Statement
- Ore Reserve Statement

Appendix 1: Competent Persons Statements

The information in this report which relates to Exploration Results or Mineral Resources is based on information compiled by Mr Justin Osborne. The information in this report which relates to Exploration Results is based on information compiled by Mr Justin Osborne, Executive Director for Gold Road. Mr Osborne is an employee of Gold Road, as well as a shareholder and share option holder, and is a Fellow of the Australasian Institute of Mining and Metallurgy (FAusIMM 209333). Mr Osborne has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Mr Osborne consents to the inclusion in the report of the matters based on this information in the form and context in which it appears

Mineral Resources

The information in this report that relates to the Mineral Resource Estimation for **Gruyere** is based on information compiled by Mr Justin Osborne, Executive Director – Exploration and Growth for Gold Road and Mr John Donaldson, Geology Manager for Gold Road.

The information in this report that relates to the Mineral Resource Estimation for **Attila Trend** is based on information compiled by Mr Justin Osborne, Executive Director for Gold Road, Mr John Donaldson, Geology Manager for Gold Road and Mrs Jane Levett, Senior Resource Geologist for Gold Road.

- **Mr Justin Osborne** is an employee of Gold Road, as well as a shareholder and share option holder, and is a Fellow of the Australasian Institute of Mining and Metallurgy (FAusIMM 209333)
- **Mr John Donaldson** is an employee of Gold Road as well as a shareholder, and is a Member of the Australian Institute of Geoscientists and a Registered Professional Geoscientist (MAIG RPGeo Mining 10147)
- **Mrs Jane Levett** is an employee of Gold Road, and is a Member of the Australasian Institute of Mining and Metallurgy and a Chartered Professional (MAusIMM CP 112232)

Messrs Osborne and Donaldson and Mrs Levett have sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as Competent Persons as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Messrs Osborne and Donaldson and Mrs Levett consent to the inclusion in the report of the matters based on this information in the form and context in which it appears.

The information in this report that relates to the Mineral Resource Estimation for **Central Bore** is based on geostatistical modelling by Ravensgate using sample information and geological interpretation supplied by Gold Road. The Mineral Resource estimates were undertaken by **Mr Craig Harvey**, previously Principal Consultant at Ravensgate and **Mr Neal Leggo**, Principal Consultant at Ravensgate.

Messrs Harvey and Leggo are both Members of the Australian Institute of Geoscientists. Messrs Harvey and Leggo have sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.” Messrs Harvey and Leggo consent to the inclusion in the report of the matters based on this information in the form and context in which it appears.

Ore Reserves

The information in this report that relates to the Ore Reserve for **Gruyere** is based on information compiled by David Varcoe. **Mr David Varcoe** is an employee of AMC Consultants and is a Member of the Australasian Institute of Mining and Metallurgy (MAusIMM).

Mr Varcoe has sufficient experience that is relevant to the style of mineralisation and type of deposits under consideration and to the activity currently being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’. Mr Varcoe consents to the inclusion in this announcement of the matters based on his information in the form and context in which it appears.

New Information or Data

Gold Road confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources and Ore Reserves that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person’s findings are presented have not materially changes from the original market announcement.

Appendix 2: Mineral Resource Table¹

	Gruyere Project Joint Venture ² – 100% Basis			Gold Road – 50%		
Project Name	Tonnes (Mt)	Grade (g/t Au)	Contained Metal (Moz Au)	Tonnes (Mt)	Grade (g/t Au)	Contained Metal (Moz Au)

Inferred	43.62	1.36	1.91	21.81	1.36	0.96

NOTES:

- All Mineral Resources are completed in accordance with the 2012 JORC Code
- The Gruyere Project Joint Venture is a 50:50 joint venture between Gold Road and Gruyere Mining Company Pty Limited, a wholly owned Australian subsidiary of Gold Fields Ltd.
- Gruyere Mineral Resource reported at 0.5 g/t Au cut-off, constrained within an A\$1,700/oz Au optimised pit shell based on mining and processing parameters from the PFS and geotechnical parameters from the previous Mineral Resource estimate (ASX announcement dated 22 April 2016)
- Central Bore Mineral Resource reported at 1.0 g/t Au cut-off (2014 Annual Report)
- Attila Mineral Resource reported at 0.45g/t Au cut-off, constrained within an A\$1,850/oz Au optimised pit shell (ASX announcement dated 1 May 2017)
- Alaric Mineral Resource reported at 0.70 g/t Au cut-off, constrained within an A\$1,600/oz Au optimised pit shell (ASX announcement dated 16 September 2015)
- All figures are rounded to reflect appropriate levels of confidence. Apparent differences may occur due to rounding
- Mineral Resources are inclusive of Ore Reserves

Proved	14.87	1.09	0.52	7.44	1.09	0.26
Probable	76.70	1.22	3.00	38.35	1.22	1.50
Total Ore Reserve	91.57	1.20	3.52	45.78	1.20	1.76

NOTES:

1. The Ore Reserve is completed in accordance with the 2012 JORC Code
2. The Gruyere Project Joint Venture is a 50:50 joint venture between Gold Road and Gruyere Mining Company Pty Limited, a wholly owned Australian subsidiary of Gold Fields Ltd
3. Gold Road holds an uncapped 1.5% net smelter return royalty on Gold Fields Ltd's share of production from the Gruyere Project Joint Venture once total gold production exceeds 2 million ounces
4. The Ore Reserve is evaluated using a gold price of A\$1,500/oz (ASX announcement dated 19 October 2016)
5. The Ore Reserve is evaluated using variable cut off grades: Oxide 0.35 g/t Au, Transitional 0.39 g/t Au and Fresh 0.43 g/t Au
6. Ore block tonnage dilution averages 3.2%; Ore block gold loss is estimated at 1.4%
7. All figures are rounded to reflect appropriate levels of confidence. Apparent differences may occur due to rounding
8. A total of 407 kt at 0.87 g/t Au for 11.4 koz at 0.5 g/t Au cut-off of Inferred Mineral Resource associated with the dispersion blanket Domain is contained within the Feasibility Study pit design (with the majority located within Stage 2). This oxide material has not been included in the optimisation, the Ore Reserve estimate nor the Feasibility Study processing schedule and presents potential upside subject to further definition with RC drilling

Gruyere – High Margin, Low Risk Mine Development

Finance and Construction

Top 3 mining jurisdiction in the World¹

Fully permitted and all agreements in place

Fully funded – zero debt, no equity dilution

A\$100M cash in excess to development requirement

Partnering with proven first class global Major gold miner

All major contracts ready to go, and within Feasibility price estimates

Gas power solution provides long-term, low-risk supply option

Potential to add renewable energy allowed in contract

Technical

A new mine – no cut backs, no underground workings, no back fill

One large scale open pit – no multi-pits, no small pits, no underground

Simple geology - disseminated gold mineralisation with huge ore blocks

Simple mining - shallow cover, low strip ratio, bulk mining, low dilution

Simple metallurgy – high gravity and high recoveries at coarse grind size

Proven SABC² and CIL² circuit technology provides flexibility and reliability

100% of Feasibility Mine Life is in Reserve – no Inferred Resource

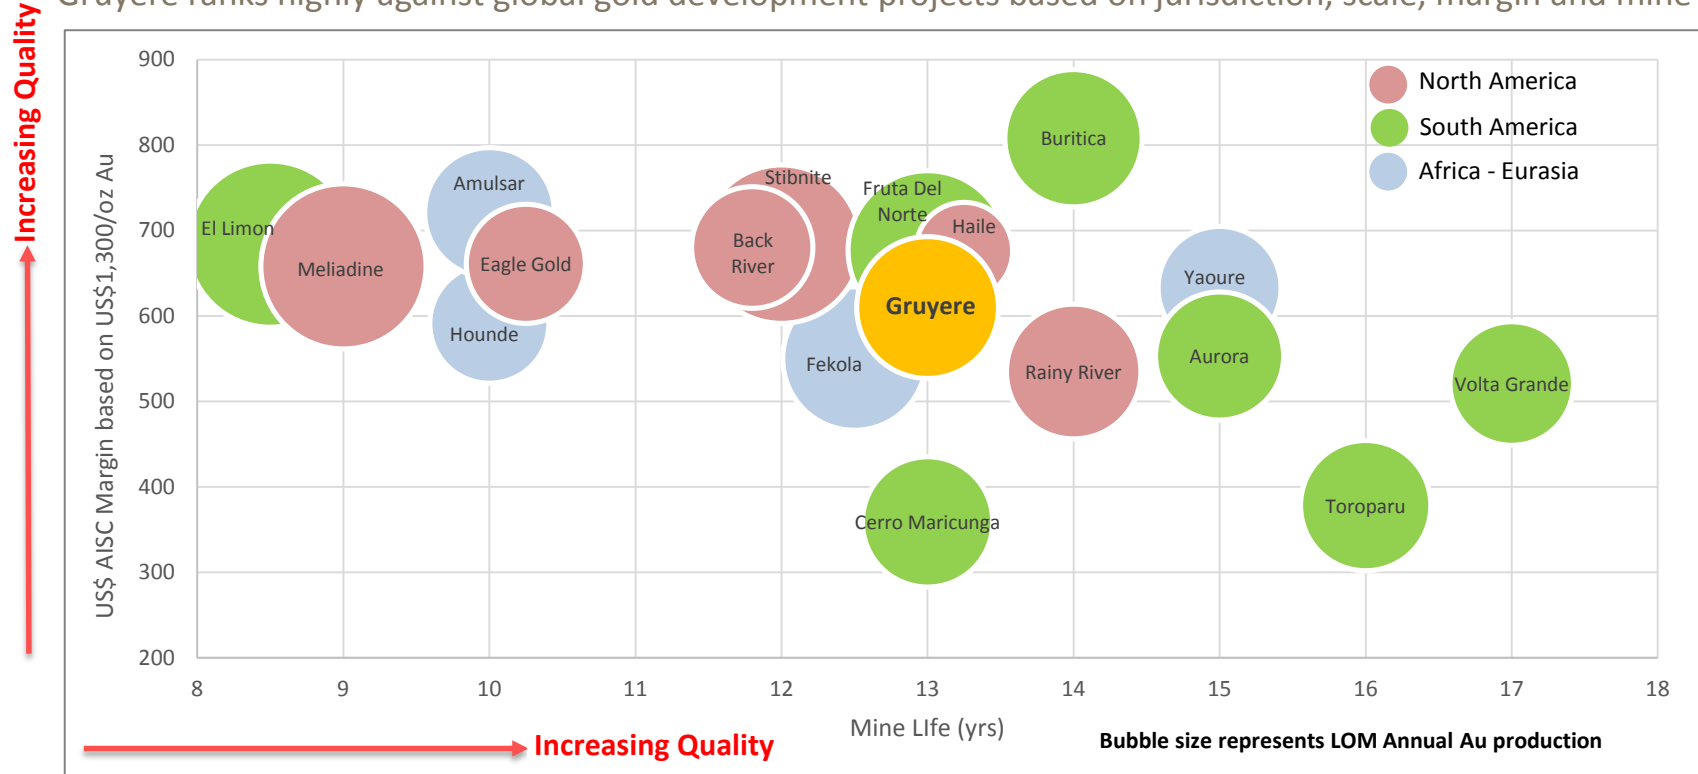

First two years of Proven Reserve already drilled to Grade Control detail

¹ Western Australia ranks as the number three mining jurisdiction in the annual **Fraser Institute Mining Survey 2016 – February 2017**

² SABC = SAG and Ball Mill with Pebble Crusher, CIL = Carbon in Leach

Gruyere on the Global Stage: Low Risk - High Quality

Gruyere ranks highly against global gold development projects based on jurisdiction, scale, margin and mine life

Source: Company filings or Capital IQ.

Note: Assets based on similar scale, predominantly gold development projects. All projects have released a Pre-Feasibility or Feasibility Study, are in construction or being currently being commissioned. Figures based on original FS or PFS where available. Asset production, cost and reserve data may have increased or decreased through the release of subsequent technical reports.

- Figures converted to US\$ based on A\$1.00:US\$0.73 exchange rate
- Capital cost converted to US\$ based on C\$1.00:US\$0.80 exchange rate
- Capital cost converted to US\$ based on C\$1.00:US\$0.78 exchange rate
- Haile Technical Report based on OGC first updated technical report post acquiring Romarco Gold.
- AISC not disclosed. Calculated as cash operating costs plus LOM sustaining capital divided by total LOM gold ounces produced. Payback period not disclosed pre or post tax cash flows
- Includes Silver at US\$22.50/oz and Antimony at US\$4.50/lb. Prices were set at a constant gold:silver ratio (\$/oz:\$/oz) of 60:1 and a constant gold:antimony ratio (\$/oz:\$/lb) of 300:1 for simplicity of analysis, although individual price relationships may not be as directly correlated over time. Historic gold:silver ratios have averaged around 60:1.
